# 1. S-locus genotyping (SRK): the S-types each plant carries

P42 (EO70) — mate-limited

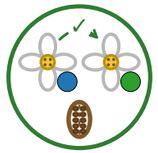

**6 S-types · 74 plants**

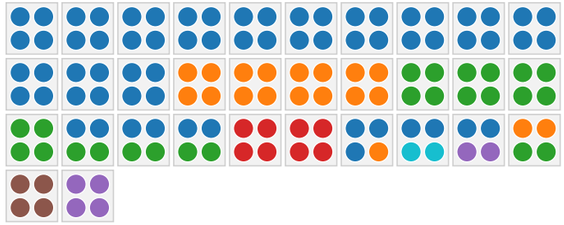

**3 S-type sets = 93 % of plants**

P34 (EO18) — intact

**7 S-types · 32 plants**

**3 S-type sets = 66 % of plants**

**Legend**

1 square = 1 genotyped plant;
4 dots = its 4 SRK copies (tetraploid)

color = S-type (as in Figure 2)
