Our populations under the traffic light

the 13 populations with two seasons of seed set for plant size (2025, 2026)

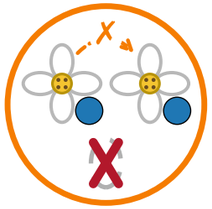

AVOID

over-producing

2 populations

- **P2** EO30
- **P37** EO38

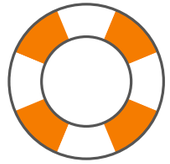

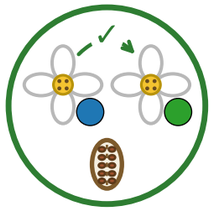

TARGET

mate-limited

6 populations

- **P8** EO27
- **P10** EO27
- **P16** EO27
- **P42** EO70
- **P6** EO67
- **P36** EO25

INTACT

reproductively intact

4 populations

- **P13** EO27
- **P34** EO18
- **P35** EO25
- **P43** EO68

Not yet under a light: 31 populations with one season of data so far (likely sources being confirmed: P26, P28, P39) and P19 (EO8) — switches between seasons · hollow chip = candidate (below expectation, not yet significant)
