
A. Seed set for plant size
B. S-types carried (SRK alleles)
C. Compatible mates per plant
Seeds per plant ÷ seeds expected for its size

2026
filled = significant (q < 0.05): differs from expectation, or (teal) lies within half – twice
open = not significant
1 circle = 1 % of S-allele copies; colour = S-type (as in Figure 5)
bar = population average
