
A. SRK genotypes: the S-types each plant carries
P42 (EO70) — mate-limited
6 S-types · 74 plants
3 S-type sets = 93 % of plants
P34 (EO18) — intact
7 S-types · 32 plants
3 S-type sets = 66 % of plants
random mating
each plant meets fathers from its population; a shared S-type = rejected
B. Compatible mates per plant
confirmed
confirmed
Share of the population a plant can mate with
100%
80%
60%
40%
20%
0%
53 %
67 %
P42 (EO70) mate-limited
P34 (EO18) intact
Legend
1 square = 1 genotyped plant; 4 dots = its 4 SRK copies (tetraploid)
color = S-type (as in Figure 1)
dot = one plant; bar = population average
